# Netherlands Journal of Agricultural Science

Volume 42 (1994)

## Subject index

*This index lists the keywords given in the headings of the papers. A number refers to the first page of the paper involved.*

acidification 293
aerobic indoor composting 271
agro-ecological characterization 159
agro-ecosystems 159
agroforestry 145
airflow 145
amino acid utilization 47
ammonia volatilization 293
animal production 3
aquaculture 3
bacterial soft rot 195
barbs 77
*Barbus intermedius* 77
Benin 69
biodiversity 77
biotechnology 271
blastocyst 225
*Brassica oleracea* var. *italica* 195
breeding 59
breeding goals 21
breeding programmes 29
broccoli 195
broilers 51
Burkina Faso 249
calabrese 195
carcass quality 235
cattle slurry 293
cell free preparation 343
correlated responses 51
Côte d'Ivoire 159
cucumber 115
*Cucumis sativus* L. 115
cyprinids 77
dairy cows 89
dairy cattle 21
dairy farming 11
deposition 37
desaggregation 159
digestibility 105
dry matter distribution 115
ecological agriculture 181
ecological sustainability 181
ecomorphology 77
economic effects 11
economic value 21
endometrium 217, 225
energy 37
environmental criteria 331
environmental legislation 21
Ethiopia 77
evaluation systems 89
excretion 37
farm economics 331
feed efficiency 51
feeding apparatus 77
feet and legs problems 371
fermentable organic matter 343
fisheries 3, 77
flowering 311
food web 77
forage maize 105
forced convection 271
fruit load 115
functional equilibrium 115
gene bank 29
genetic resources 29
gilt 217
governmental policies 11
grassland 293
grass silages 203
head rot 195
in vitro culture 225
indigenous vegetation 145
inland valleys 159
*in situ* 343
*in vitro* 343
*in vitro* culture 225
irradiance 115
isolated single trees 145
Lake Tana 77
leaf production 311
light 115

linear programming 21
low external input agriculture 181
lysine 37
mastitis 371
meaningful diversity 249
methodology linking different sources 125
microbial protein 203, 343
milk yield 371
model description 271
multiple scales 159
mushroom compost 271
N efficiency 47
net feed efficiency 59
the Netherlands 125
NIRS 105, 357
nitric acid 293
nitrogen fertilization 195
nitrogen losses 11, 21
oestrogen 225
oestrogen receptor 217
oestrus cycle 217
organs 37
parkland 145
partitioning 37, 115
pesticides 331
pesticide use 125
pH 235, 293
phosphorus 357
photoperiod 311
physiological feeding strategy 47
phytase 357
phytate phosphorus 357
pig 37, 225
pollution 59
pork quality 235
potato 311
pregnancy 217
protein 37, 89
protein digestion 203
protein production 47
PSE 235
residual feed consumption 59
resource partitioning 77
risk avoiding 249
root-shoot ratio 115
rumen fluid 343
savanna woodland edge 145
selection 51
short-term catabolic factors 47
slaughtering 235
small ruminant production 69
*Solanum tuberosum* L. 311
solid state fermentation 271
sorghum 249
sparse tree canopy 145
spear rot 195
stock identification 77
stress 59
sustainability 69
sustainable agriculture 181
sustainable development 181
sympodial development 311
system analysis 3
temperature 115, 311
the Netherlands 125
toposequence 249
trophic segregation 77
type traits 371
vegetable feeds 357
vegetative-generative growth 115
West Africa 159
wind reduction 145

## Author index

Almekinders, C.J.M. & P.C. Struik, Photothermal response of sympodium development and flowering in potato (Solanum tuberosum L.) under controlled conditions 311
Andriesse, W., L.O. Fresco, N. van Duivenbooden & P.N. Windmeijer, Multi-scale characterization of inland valley agro-ecosystems in West Africa 159
